

Aung Myint Myat

Data Analyst Engineer

aungmm27002@gmail.com
+65 8197 0484
Singapore 730606

Professional Summary

Highly motivated Computer Science graduate with hands-on experience in data analysis, machine learning, and full-stack development. Skilled in Python, SQL, and building predictive models, with proven ability to independently design and ship full production websites end-to-end. Seeking a Data Analyst role to deliver data-driven insights.

Work Experience

SIMBA

Telecom Technical Support Associate

SIMBA Telecom, Singapore | Jan 2023 – Mar 2026

- Performed backend system checks using internal platforms (Novus, TapiTapi, Shop) to verify customer account status, SIM activation, and service configuration.
- Investigated customer service issues by analyzing system data and service logs, identifying potential account or network problems.
- Created and managed Jira tickets for backend engineering teams, documenting technical issues and supporting issue resolution workflows.
- Assisted in troubleshooting mobile network connectivity, data service activation, and telecom account management.
- Maintained accurate case documentation and collaborated with internal teams to ensure timely issue resolution.

Projects Experience

Freelance Web Developer — CTR Holdings Ltd (HKEX: 1416)

HTML, CSS, JavaScript, fullPage.js, GitHub Actions, Puppeteer, Vercel

- Sole developer on a full corporate website rebuild for a Hong Kong-listed Singapore construction group (1,800+ employees) — independently handled architecture, design, development, and deployment, replacing an outdated WordPress site.
- Independently built and shipped 7 core pages plus 20 individual project case studies, deployed on Vercel.
- Designed and built an automated data pipeline (GitHub Actions + Puppeteer) that scrapes and updates official HKEX regulatory filings daily.
- Delivered a fully bilingual site (English / Traditional Chinese) — including forms, search, filters, and downloads.
- Achieved a Grade A security rating (securityheaders.com) with no external security consultant.
- Built interactive features end-to-end: filterable Clients & Media page, site-wide search, and a working contact form with map integration.

Real Estate Price Prediction Platform (Singapore)

Python, Flask, React, PostgreSQL

- Built a full-stack ML platform to predict property prices using historical Singapore datasets.
- Improved model accuracy via data cleaning, feature engineering, and location-based insights.
- Developed AI-driven recommendations to support buyer decision-making.
- Created interactive dashboards and geospatial visualizations for market trends.

Reinforcement Learning Robotic Arm (Simulation)

Python, PyBullet, OpenAI Gym

- Trained a robotic arm using the PPO algorithm for object grasping tasks.
- Modeled the problem as an MDP with defined states, actions, and rewards.
- Achieved an 85% success rate (vs. 10% baseline), demonstrating strong policy learning.

Bird Species Recognition (Deep Learning)

Python, PyTorch

- Built an image classification model for 200 bird species (CUB-200 dataset).
- Compared CNN, ResNet, and EfficientNet architectures with transfer learning.
- Achieved 79.4% accuracy using EfficientNet-B3.

Skills

Technical Skills

Languages: Python, SQL, JavaScript
Tools: Pandas, NumPy, Scikit-learn, Flask, React
Databases: PostgreSQL
Other: Machine Learning, Data Visualization, API Development

Soft Skills

- Problem-Solving
- Analytical Thinking
- Communication
- Team Collaboration
- Attention to Detail
- Time Management

Education

Bachelor of Computer Science (Big Data)
University of Wollongong, Australia | Year of Graduation: Feb 2026

Diploma in Information Technology
Singapore Institute of Management, Singapore | Year of Graduation: Mar 2023

Language

- English (Fluent)
- Burmese (Native)
